

NRCs for Climate Change Impacts, Vulnerability and  
Adaptation  
Members of WG 6 on Adaptation  
National Focal Points

07 February 2020

Dear colleagues

**Online review of draft EEA report “*Monitoring and evaluation of national adaptation policies along the adaptation policy cycle*”**

I am pleased to inform you that the final draft EEA Report “Monitoring and evaluation of national adaptation policies along the adaptation policy cycle” is now available for online review.

You will find the draft report here (Eionet login required):

<https://forum.eionet.europa.eu/nrc-climate-change-adaptation/library/eea-products-climate-change-adaptation-review/monitoring-and-evaluation-national-adaptation-policies-along-adaptation-policy/>

If you do not have an EIONET login, please contact your NFP. However, if you only plan to review this report, please send an email to Wouter Vanneuville ([wouter.vanneuville@eea.europa.eu](mailto:wouter.vanneuville@eea.europa.eu)) and you will get a direct invitation that allows you to read and review this draft report.

The report provides an overview of country developments in terms of strategies and plans for climate change adaptation (CCA) and their implementation in a context of global and European policy frameworks. The report brings together lessons learned - on national level – on adaptation Monitoring, Reporting and Evaluation (MRE), future directions and opportunities for mutual learning on evaluation of CCA strategies and plans at national and European level and implications of emerging reporting requirements from relevant EU policies to improve evaluations at EU level.

Please note that an executive summary is not included in this draft report. EEA is currently developing a summary, which will be based largely on highlighted messages from each chapter and on the concluding chapter.

The EEA is seeking your views on the current draft, in particular regarding:

- The content and structure of the document;
- The information used for the analysis;
- Highlighted messages and other key findings; and
- Conclusions.

Please disregard any language-related comments as the report will undergo English language editing.

EEA uses the 'talkback consultation' tool to gather comments online. On the webpage of this consultation, you will find a PDF version of the report, which also includes the bibliography as well as a draft glossary. However, I like to ask you to provide comments via the online forum only. Use of the online forum enables EEA to review all comments systematically and to document the responses. It also allows you to forward the invitation to others in your organisation who you may wish to involve.

Please be aware that your comments will be visible to other reviewers of the report. Furthermore, we intend to make reviewer comments, together with the response of the authors, available to Eionet members upon publication of the final report.

I like to kindly ask you to provide your **comments latest by Friday 20 March 2020**.

Please keep in mind that EEA will put a report on urban and local adaptation into online review at the beginning of March 2020 when planning your responses on this online review.

In case of any problems or questions with the online tool, please contact the Eionet helpdesk ([helpdesk@eionet.europa.eu](mailto:helpdesk@eionet.europa.eu)). Regarding the process and the content of the report, please contact the responsible EEA project manager, Wouter Vanneuille ([wouter.vanneuille@eea.europa.eu](mailto:wouter.vanneuille@eea.europa.eu)), or me ([andre.jol@eea.europa.eu](mailto:andre.jol@eea.europa.eu)).

We are very much looking forward to receiving your comments. We thank you in advance for your cooperation.

Yours sincerely

André Jol  
Head of Group Climate Change Adaptation and LULUCF
