

Energy system report breakout group

Presented by Clare Downing

Report published spring 2019

- 1) Some countries have assessed the energy sector as part of the CCIV (knowledge patchy available)
UK has legislation requesting energy companies to report climate change risks
- 2) Complex scene and many interactions
- 3) All participants welcomed work in this area
UK, Greece and Portugal offered to be in stakeholder group.
- 4) &
- 5) Including on & offshore wind, renewables, electricity, transboundary networks, gas/oil, energy demand (cold/hot), CCS
- 6) More guidance and methodological coherence for best way to address climate proofing and resilience of infrastructure and energy systems
